

- PAMS-net** is a joint collaboration between AMRIC and the IOP. PAMS-net is an all-inclusive network for pharmacists from all professional backgrounds including community pharmacy, hospital pharmacy, education, research and many other roles. The mission of PAMS-net is to support pharmacists across all sectors to work towards the common goal of promoting responsible use of antimicrobials in all patients and limiting the emergence of antimicrobial resistance. [Watch this video tutorial on how to join the PAMS-net discussion forum](#). You can enrol on the PAMS-net discussion forum on [PAMS-net webpage on IOP.ie](#). To access these links you must be enrolled in the forum and logged in to your IOP account.
- AMRIC IV to oral switch toolkit:** <https://www.hse.ie/eng/services/list/2/gp/antibiotic-prescribing/hospital-related-guidelines/hse-amric-intravenous-to-oral-switch-toolkit-february-2025.html>
 Guidance, implementation tool, generic presentation, poster, metronidazole factsheet
- Respiratory tract infection** – antibiotic prescribing guidance for community setting: [https://www.hse.ie/eng/services/list/2/gp/antibiotic-prescribing/conditions-and-treatments/upper-respiratory/Respiratory infection information leaflet \(including self-care and safety-netting advice\) \(PDF 488 KB\)](https://www.hse.ie/eng/services/list/2/gp/antibiotic-prescribing/conditions-and-treatments/upper-respiratory/Respiratory%20infection%20information%20leaflet%20(including%20self-care%20and%20safety-netting%20advice).pdf) for GP consultations with patients presenting with respiratory infections that do not require immediate antibiotics.
- Antimicrobial stewardship microlearning videos for community pharmacists** - aim to provide bite-size learning that can be easily integrated into community pharmacists' working day. The videos are all less than 10 minutes duration and are available via YouTube link, allowing single click access to CPD content for flexible and quick learning.
