

IIOp Cancer Care Hub

The **aims** of the hub are to support pharmacists in providing optimal care to patients with cancer and to support pharmacists to answer cancer-related queries which may arise in everyday practice or when preparing for conversations with patients receiving cancer treatment.

The content within the Hub has been organised into **six main pillars** which reflect **the cancer care continuum**:

1. Introduction to Cancer Care
2. Prevention and Early Detection
3. Treatment of Cancer
4. Management of Side Effects
5. Survivorship
6. Palliative Care

Introducing the
IIOp Cancer Care Hub

 Introduction to Cancer Care An overview of cancer care in Ireland, including key statistics, guidance documents and resources	 Management of Side Effects Information about side effects and their management
 Prevention and Early Detection Information to support a healthy lifestyle, and important cancer screening signposting	 Survivorship Information to support wellbeing and life after a cancer diagnosis
 Treatment of Cancer Resources to inform and support the clinical aspects of cancer treatment	 Palliative Care Information to support improvement in quality of life of people facing life-limiting illness
