

Cancer Care in Primary Care

An interprofessional course for Primary Care teams

MSD

MSD provided funding towards the course origination and delivery costs

Improve your practice with an **iheed** postgraduate course

Cancer Care in Primary Care

Designed specifically to cater for busy health professionals, this 7-week course is a response to the recent National Cancer Strategy and combines practical and case-based learning.

The nature of cancer care is changing with an increasing emphasis on prevention, early diagnosis and patient experience during and after treatment. In Ireland, the Department of Health published a National Cancer Strategy in 2017 and this course will assist participants in delivering aspects of this strategy.

This 7-week course, comprising 26 learning hours, is the ideal way to further your knowledge and career in cancer care management in primary care. The course is provided by iheed, a leading medical education technology company, in conjunction with the Department of General Practice at University College Cork (UCC) and Professor Seamus O'Reilly, Consultant Medical Oncologist.

Who is the course aimed at?

This course has been developed by expert leaders in the field of cancer care. The programme:

- › Is aimed at primary healthcare professionals including doctors, nurses and pharmacists
- › Has been specifically customised to meet the needs of Irish health care professionals
- › Is aligned with the National Cancer Strategy

How will the course be delivered?

Commencing in December with a 1 day workshop and followed by 6 weeks of online delivery beginning in January 2018, this interactive course will be delivered through a stimulating online environment that is:

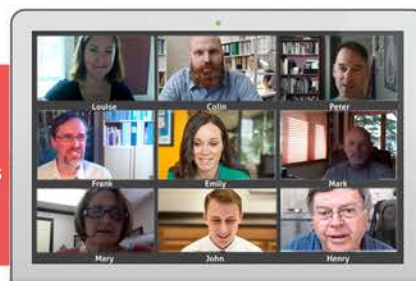

- › Facilitated by a team of distinguished experts in cancer care
- › Designed to maximise interaction and associated learning benefits by keeping groups small
- › Tutor-led with peer-to-peer knowledge sharing
- › Flexible and designed to meet the needs of busy professionals

What will you gain from the course?

The course is aligned to the National Cancer Strategy, and as such, the IOP have confirmed it as suitable for participants to record in their e-portfolio. Participants will also benefit from:

- › An enhanced understanding of cancer care
- › Improved competencies and confidence in the screening, diagnosis, and management of cancer
- › Increased understanding of the support and care needs of people with cancer
- › Understanding common side-effects and complications.
- › Strengthened interdisciplinary partnerships

Delivered by leading cancer experts in a blended learning model that utilises face-to-face online tutorials, as well as self-directed learning and latest research.

iheed 
accredited medical education online

Who is iheed?

iheed is a world-class, next generation, medical education organisation, specialising in primary care. Facilitated by an in-house team of medical experts, we partner with government ministries and national healthcare organisations, to meet their healthcare needs - quickly, cost effectively and to the highest standards.

Course entry requirements

To be eligible, participants must

- › Be a doctor, nurse or pharmacist registered with their respective professional body
- › Be proficient in English
- › Have access to a laptop with a microphone, speakers, webcam and reasonable broadband coverage

Course Costs

The initial course intake is fully funded with no participant fee payable.

There are 50 spaces available on this initial intake. Should capacity be reached, places will be on a 'first-come, first-served' basis.

Course Timetable

Introductory workshop
2nd December 2017

Weekly live online tutorials
8th January - 12th February 2018
